The Advisory Board consisted of the eminent Educationists namely Mr. Vijay Phanshikar (Editor - 'The Hitavada'), Ms. Kanta Vadehra (Education and Training professional), Mrs. Savitri Singh (specializes in early childhood education), Dr. Hemant Pande, (Head of Chemistry Dept., Rtd -Hislop College, Nagpur), Dr. Dilip Thosar (alumnus of IIT Kharagpur and IIM Ahmedabad), Mr. Ajinkya Kottawar (mechanical engineers and a passionate innovator, with 18 patents and 4 copyrights on his name). Mr. Sradhhalu Ranade, is a scientist, educationist and a renowned scholar) joined us virtually for the meeting.

APM Annual Principals Meet

MGS Initiatives

Digital Future Classroom

What is 'Future Classroom' ?

Google for Education has developed "Future Classroom" a solution which is a digital learning zone for teachers, students and parents to experience 21st century skills such as critical thinking, communication, collaboration and creativity.

Highlights

Chromebooks

It helps students experience personalized learning environment

Digital Content

The interactive subject specific Digital Content, Experiments and Science Videos enable the teaching learning process to graduate from "Chalk and Talk" method of teaching to "Interactive and Intrinsic Learning" method of teaching.

Classroom Apps

Applications designed to help to create, collect and keep track of paperless assignments and provide real time feedback and grades.

24/7 Accessibility

Accessibility anytime, anywhere, on any device.

CS Pathshala

In today's world of emerging technology, it is essential to train children to be creators and inventors of technology and at the same time, they need to be socially responsible citizens. The primary goal of teaching Computational Thinking is to teach computing skills without using computers to develop the ability to solve problems and express the solution in the form of a process. It is therefore imperative to teach computing, which promotes problem-solving, computational thinking and critical reasoning skills, at par with Mathematics and Sciences. CS Pathshala, with the aim of bringing computational thinking skills to schools, was introduced as a pilot project for classes I to VII in Math and Computer at Meghe Group of Schools (MGS) in session 2017-18. After the successful implementation, it was decided to integrate the same with Math and Computer for the academic session 2018-19.

Total 6000 students of MGS are learning computational Thinking Skills which is the most important skill of 21st century. MGS is the only group in Maharashtra to integrate this curriculum in Mathematics and computers. The principles of computational thinking like decomposition, pattern recognition, and generalization, algorithms, and programming are explained in CS Pathshala curriculum through play way method which helps students to enjoy and understand concepts easily. Daily life integration is one of the main features of the curriculum.

MGS was also a part of the first conference on Computational Thinking in Schools which was held in Pune in April 2019. Mrs. Geeta Ghormade, Head – Resource Centre was one of the speakers for the event, who shared the experiences from MGS on the topic. Further, the interaction with other participants and speakers in the conference played a major role in strengthening the program for the upcoming session 2019-20.
